EXOVISION™ rendering

EXOVISION™ led the way to an amazing transformation

Following the purchase of a beautiful new lake home, our clients returned to their primary residence feeling that their home of 27 years was crying out to them saying, "What about me?" Inspired an EXOVISION™ architectural rendering of thier home, they were encouraged to begin the renovation. With the installation of a handsome front portico, fiber-cement siding, architectural roof, seamless aluminum gutters, and craftsman-style details including granite & flagstone stone accents, fiber-cement shake accents, decorative brackets & moldings, copper shed roofs, board & batten shutters, and painted brick, our clients are now as eager to arrive to their primary residence as they are their new lake home.
